

The North Carolina Conservation Network (NCCN) and Pesticide Education Project (ARC/PESTed) proudly present...

Toxics in your School

Join us on the Fall 2005 Take Action Tour to find out how together we can prevent exposure to toxic chemicals, and ensure that North Carolina's most precious natural resources – *our children* – stay happy and healthy.

When? Thursday, October 20th, 7 pm – 8:30 pm

Where? Kathleen Clay Edwards Library, 1420 Price Park Dr, Greensboro

What? Presentation, networking and community discussion with plenty of Q&A. Learn about legislative efforts to protect NC children from toxics at school, and what you can do to get involved. Light refreshments will be provided, and children are welcome – bring your whole family!

More Information? For more information and to RSVP, please contact Billie: billie@pested.org, or 919-833-1123
