Get your voice heard!
Photos, videos, and
your messages for a
green economy!

The Rolling Sunlight truck will power an air-conditioned tent with its solar array! It's on tour around the US!

For info. or to volunteer, email sfuller@peace.edu

ABOUT THE GLOBAL WARMING STORY TOUR 2008

Americans are working to stop global warming: families are saving energy and businesses are investing in renewable energy. While important, these actions alone won't stop global warming. We need action from our leaders in Congress— but they won't do anything until they hear from us. That's why Greenpeace is travelling the country to talk to people about how global warming is changing their lives and how they are working to stop it. Join us. Come meet Greenpeace, make a video, write a postcard, or send an email and ask Congress to take action. We'll bring your solar-powered messages to our leaders in D.C. to make sure they do their part. Together, America can stop global warming!
